Peabody Meet

Halstead Comments:

It turned out to be a GREAT day for a meet. Temperatures were in the lower 80's, with some high clouds. Three to four inches of rain earlier in the week made for a muddy and very soft course in spots, but it did seem to smooth out some rough areas we've experienced in the past. Even though it was a small meet, the competition was good.

Overall, I felt the runners ran well and competed hard. Times were very deceiving as the course was adjusted because of wet conditions. Times were much slower than last year for all runners. We have been pleased with the progress the runners have shown each day at practice and in meets, and feel good about the remainder of the season ahead. All we ask is to challenge ourselves and continue to improve.

Our next competition comes quickly as we travel to the ALWAYS TOUGH, SE-Saline meet, on Tuesday, September 21, 2010. Both high school and middle school teams will be competing.
